

MEDICAL AND PUBLIC HEALTH PREPAREDNESS FOR LARGE SCALE DISASTER

International Research Institute of Disaster Science (IRIDeS)

Co-sponsored by

Japan International Cooperation Agency (JICA)

Supported by

Ministry of Health, Labour and Welfare Japan

Mar. 16 (Mon), 13:30-19:30

B102, Kawauchi Kita Campus

Language: English (No translation available)

People's mental and physical health should be prioritized in disaster risk reduction. International cooperation and coordination of medical and public health relief should include multi-hazard approach including radiological and biological hazards. The disciplines of international disaster medicine and public health should be established and standardized at least in the regional level to make the regional network possible. This workshop will discuss the standardization of education and training of health professionals both in general practitioner level and disaster medical experts as well as the training program for foreign medical teams.

15:20-15:40
