Wireless LAN Access Points guaranteeing communications even during large-scale disasters
NEC Corporation

▎ DTN（※）technology over Wireless LAN Access Points

- Ad-hoc networking with DTN Access Points (DTN AP)
- A DTN AP brings information by moving around to other DTN APs
- Users can access information on a DTN AP via standard Web browser

※DTN (Delay/Disruption-Tolerant Network) enables data transfer even if end to end connectivity does not exist, and links are unstable and unreliable.

Portable DTN AP

Fixed DTN AP

Evacuation center
